SKILLS

`Java` `PHP` `Javascript` `Html` `CSS` `Mysql` `GitHub` `C` `C#` `AJAX` `DBMS` `Excel` `Rest APIs` `OOP` `Data structures & Algorithms` `Python` `Operating Systems` `XML` `Communication` `Collaboration` `Leadership`

PROJECTS

Hospital Management System- (11/2022 - 01/2023)
- Developed and implemented a Hospital Management System utilizing Java for frontend development and MySQL for backend database management.
- This system aimed to streamline hospital operations, including patient management, doctor appointments, inventory control, and billing.
- Implemented a user-friendly interface that enhanced the user experience for hospital staff.

Online Quiz System- (09/2023 - 11/2023)
- Online Quiz System allowing users to take quizzes.
- Utilized **Java for the frontend**, creating a user-friendly interface with **JFrame in NetBeans, and MySQL for secure data storage and retrieval**.
- Enhanced an efficient and user-friendly Online Quiz System meeting project requirements.

E-Commerce Bookstore- (06/2023 - 10/2023)
- Enhanced a website for a government publication bookstore using **HTML, CSS, JavaScript, and PHP**.
- The website facilitated online browsing, purchasing, and management of government publications, ensuring a user-friendly experience.
- Implemented **PHP** for server-side scripting to handle user requests, manage sessions, and interact with the backend database.
